

# Selfie Wizard

Hot Folder for Windows

1.8

**Note: This is a Time Limited Demo Version and will stop working 5 July 2019**

**What is this program:**

It's a small yet extremely flexible utility program for Windows 7/8/10 that allows you to share resources between the Selfie Wizard and a PC (Photo Booth)

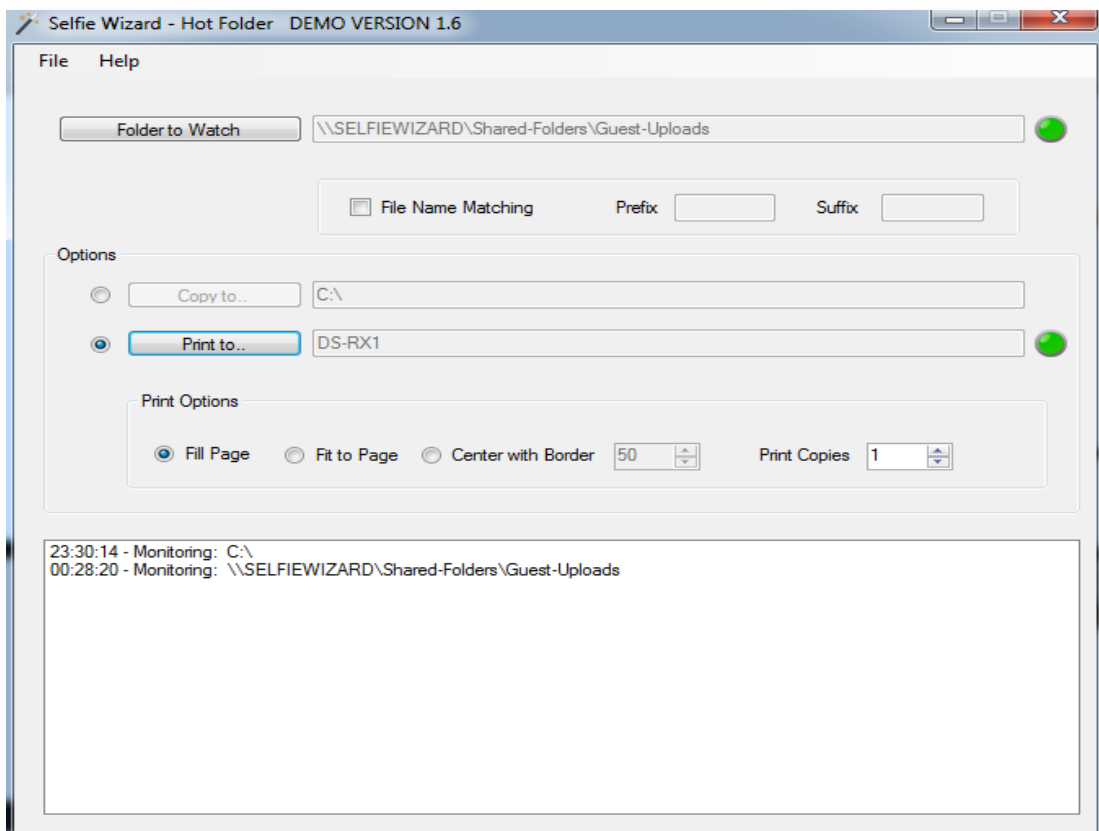

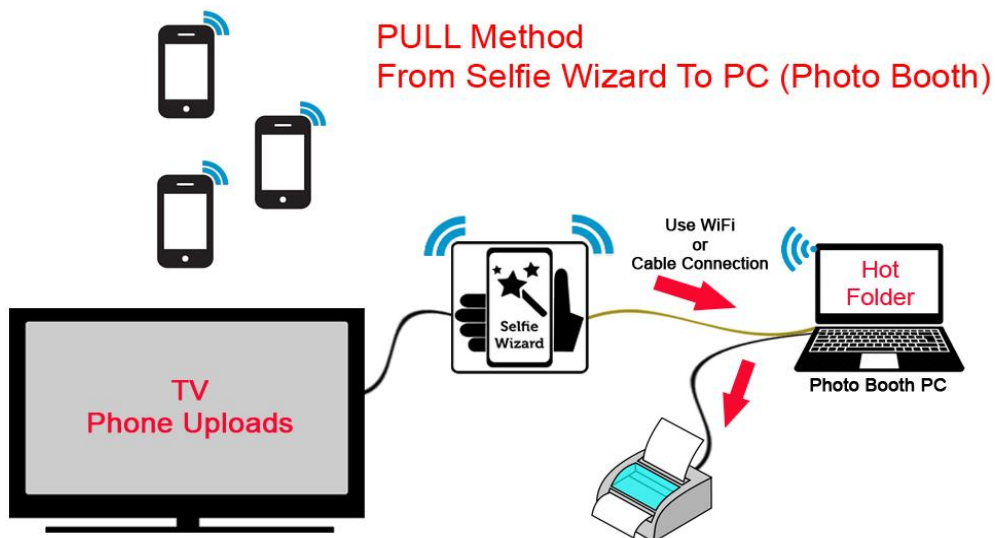

Watch any folder of your choice (Hot Folder) for new images and then either

- a. Copy them to another location
- b. Print them to a printer of your choice

**The Selfie Wizard MUST be visible on the PC Network**

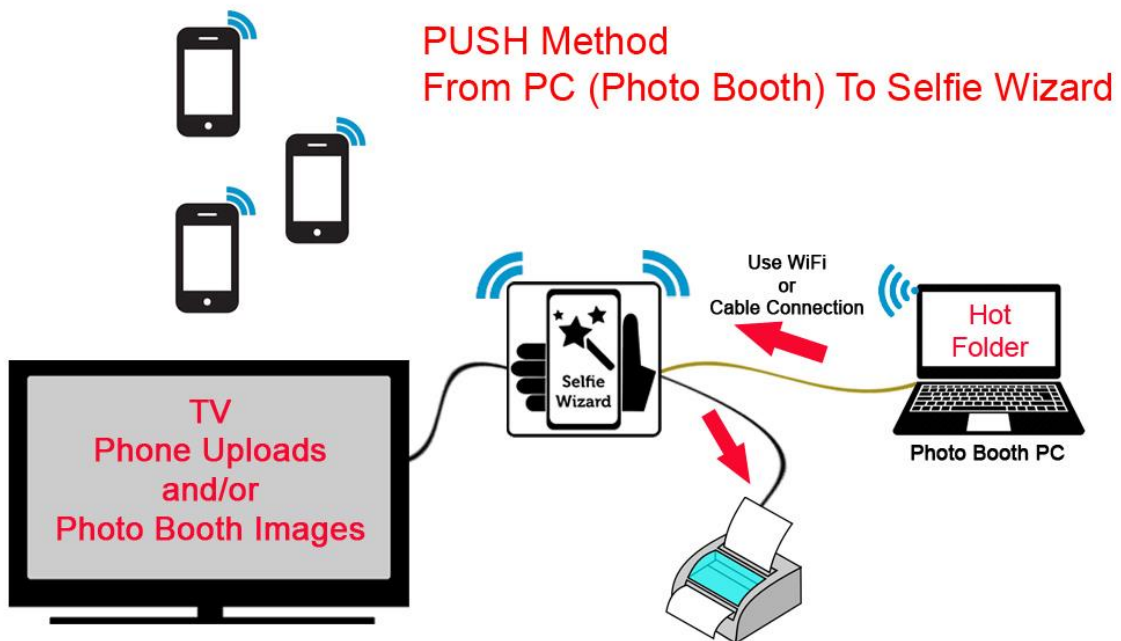

## PULL Method

- **Copy Photos from the Selfie Wizard to your PC**
- Print those photos automatically on your PC connected Printer
- Allow the use of any Windows supported printer that may not be directly compatible with the Selfie Wizard  
e.g. Mitsubishi D90
- Allow the use of other processing software and techniques from the PC

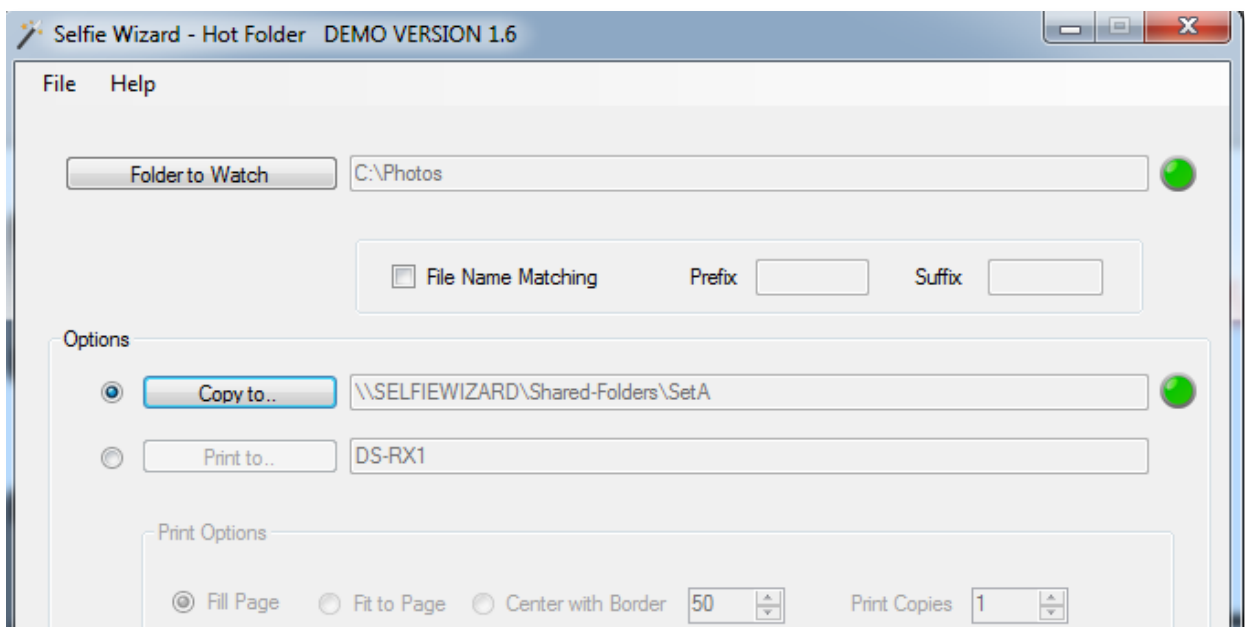

## PUSH Method

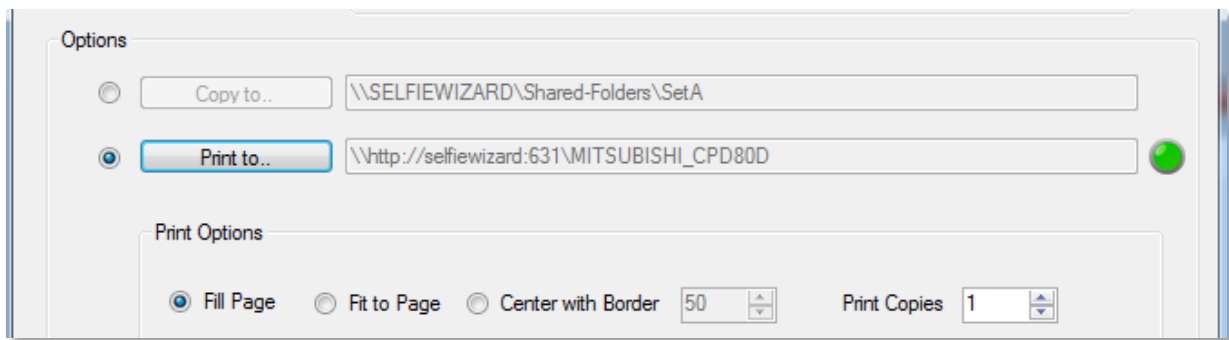

- **Copy photos from your PC (Photo Booth) to the Selfie Wizard**  
e.g. Photo booth images for TV Slideshow
- **Print Photos to a SW connected Printer**  
e.g. Act as a remote wireless print server

**To display as a SlideShow - Copy to one of the Shared-Folder SetA – SetD**

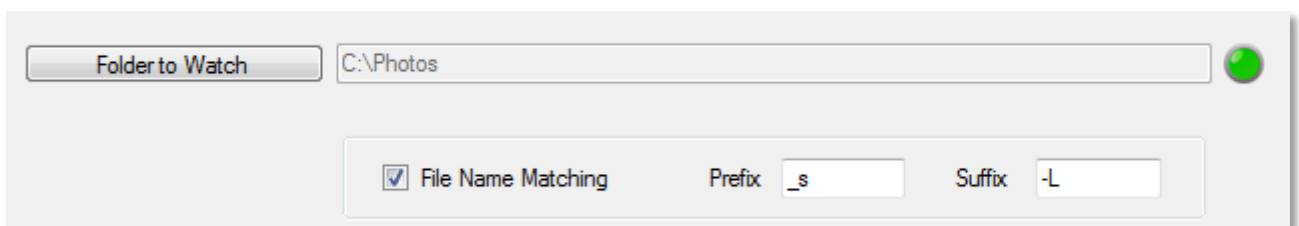

## To Print to the Selfie Wizard Printer

**Fill Page = Zoom to fill and crop image if required**

**Fit to Page = Print maximum size without cropping**

**Centre with Border = Full image with minimum border in pixels**

### **File Name Matching Examples:**

**Prefix will match any image file starting with \_s**

**e.g. \_s20180705-201801-L.jpg**

**Suffix will match any image file ending with -L**

**e.g. \_s20180705-201801-L.jpg**
