

Selfie Wizard Pro Version Only

How To..?

AirPrint from iPad

Connect the iPad to the SelfieWizard WiFi

Printers installed and connected to the Selfie Wizard will be available to the iPad print setup dialog

Setup varies between iPad Booth Apps, the following have all been tested and confirmed to work:

Photo Media Booth

Lumabooth

PixBooth 2 (Curator)

Breeze for iPad

Display Images from iPad to Selfie Wizard SlideShow

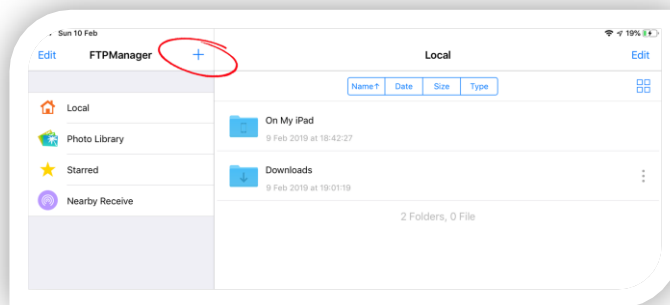

AirPrint data is sent in a raw format so is unsuitable for display purposes.

The simplest option for transferring copies of the images to the Selfie Wizard is by using a separate App that supports FTP transfers.

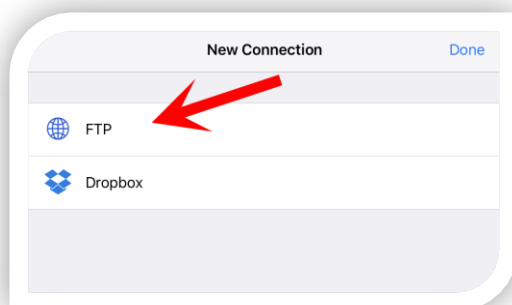

Images will be transferred into the FTP Shared Folder

FTPManager (Skyjos Ltd) Free App

1. Download from the App Store
2. Open the App then Click on the + symbol

3. Select > FTP

4. Enter the following settings:

Display Name: Selfie Wizard

Host Name/IP: 10.10.10.10

User Name: swiz

Password: swiz

Click > Save

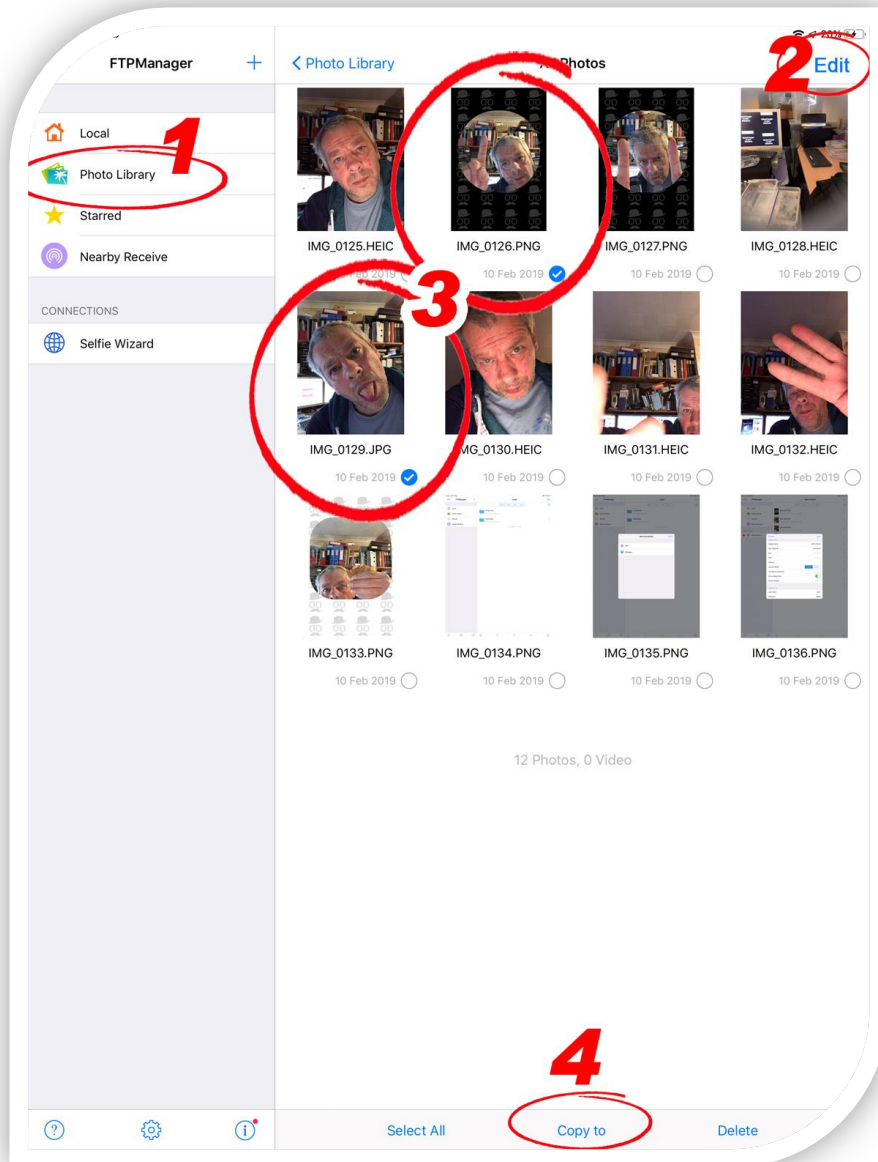

The image shows a settings dialog box with a light gray header containing 'Cancel' on the left and 'Save' on the right. Below the header is a section titled 'CONNECTION' with a light gray background. The settings are as follows:

Display Name	Selfie Wizard
Host Name/IP	10.10.10.10
Port	Optional
Path	Optional
Protocol	>
Transfer Mode	Passive Active
Use Server External IP	<input type="checkbox"/>
Show Hidden Files	<input checked="" type="checkbox"/>
Server Charset	UTF8 >

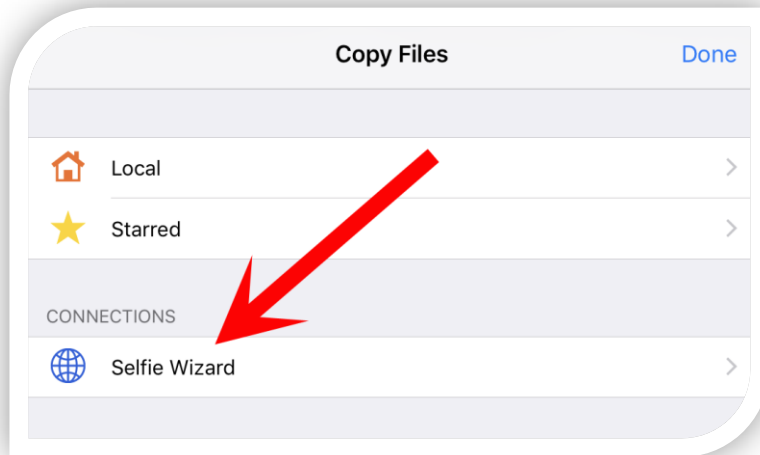

Below the 'CONNECTION' section is another section titled 'CONNECT AS' with a light gray background. It contains the following settings:

User Name	swiz
Password	••

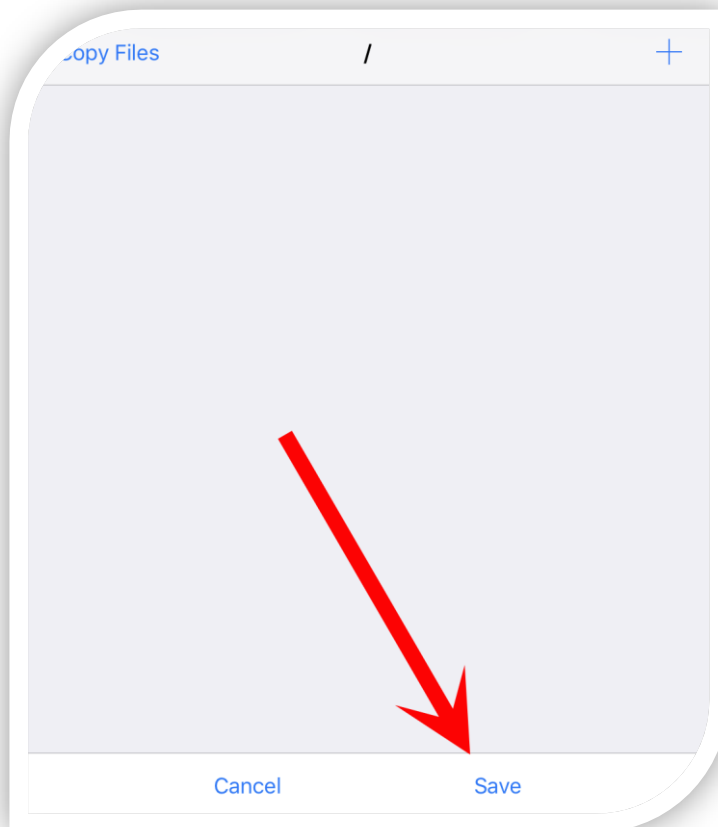

5. 1: Select > Photo Library
- 2: Click > Edit
- 3: Select the photos you wish to transfer
- 4: Select > Copy to

6. Select > Selfie Wizard as the location

7. Click > Save

An alternative Paid App is **PhotoSync** available from the App Store priced £3.99
It's FTP transfer works in the same way but with a few extra features

- One button Quick Transfer
- Transfer only new photos
(Remembers which photos have already been transferred)
